

RACHEL FOR GREEN & CHARITIES OFFICER

Hi! I'm Rachel, a second year BioNatsci, and I've been the Green and Charities Officer since the summer holidays.

I've really enjoyed being G&C officer this term and would love the chance to carry on in the new year, and continue with the projects I have started :)

("Photo of me taken while writing my manifesto and realising I didn't have a picture to put on it")

Green

What I have done so far...

- Launched a new **food waste disposal trial scheme**, in which food waste is collected by bedders.
- Attended meetings with the MCR Green Officer, and College staff to start work on **Green Impact** for the new academic year.

What I'd like to do next...

- Work with housekeeping to scale up the **food waste project** to include all kitchens/ gyp rooms (both onsite and on Jesus Lane/King St./St. Andrew's St.) – making proper food waste disposal easy and accessible for all students.
- Support the college in working towards a **Platinum Green Impact award**.
- Work with Green Officers at other colleges to help plan events for upcoming **Green Weeks**.
- Improve **communication** between staff and students about the college's green targets and projects (so we can hold them accountable to their promises!)
- ...and make sure to listen and act on any suggestions/ ideas that you guys have :)

Charities

What I have done so far...

- Co-organised a **plant sale** and **murder mystery dinner** to raise money for our College Charities (working alongside our Welfare officers).

What I'd like to do next...

- Oversee the selection of JCR-elected charities for 2023 (giving all students the chance to nominate and vote on charities that are important to them).
- Organise more **fun charity events** which aim not only raise money for the selected charities, but also to benefit welfare and promote socialisation across year groups.
- Set up **end-of-term food bank collections**.
- Keep everyone updated on how much we've raised for charity at the end of each term.
